

Appendix of Now I'm Not Afraid: Reducing Fear of Missing Out in 360° Videos on a Head-Mounted Display Using a Panoramic Thumbnail

Shoma Yamaguchi, Nami Ogawa, Takuji Narumi

- Eye tracking data

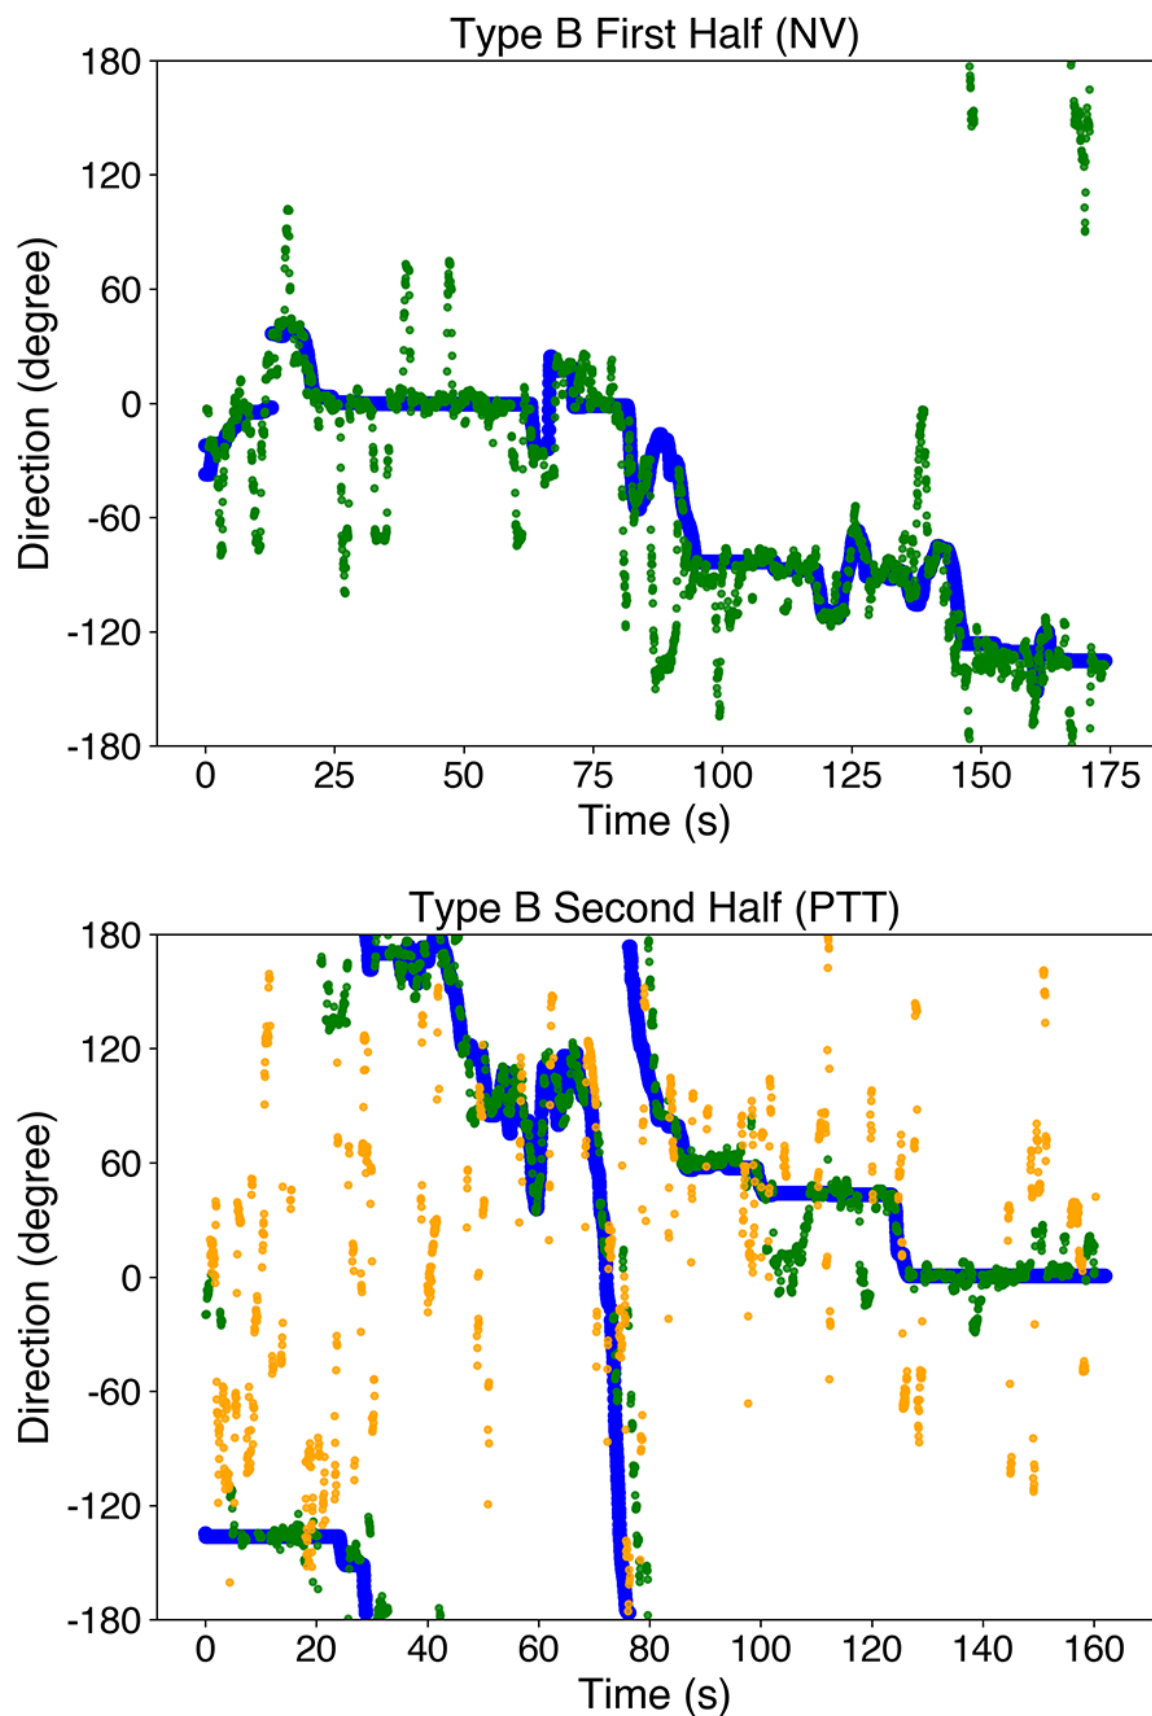

Figure 1: Visualization of the direction ($^{\circ}$) in which a representative participant was looking and the location of the ROI at a given time (s) after the start of the Type B video. The blue plots show the location of the ROI, the green plots show where the participant was looking on the sphere, and the yellow plots show where the participant was looking on the panoramic thumbnail.

- Amount of Looking Around

Figure 2: Box plots of amount of looking around for NV and PTT for each video type.

- Correlation between the amount of looking around and the length of looking at the panoramic thumbnail

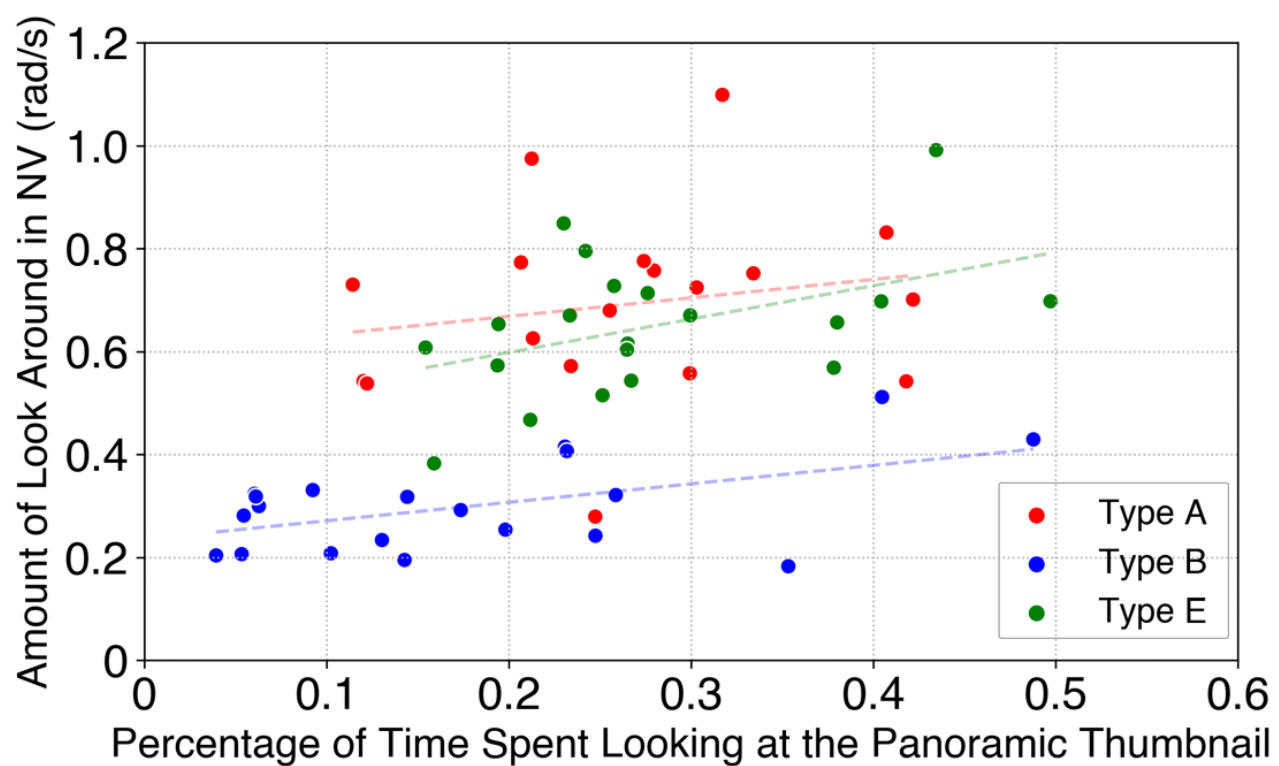

Figure 3: Distributions of the amount of looking around and length of looking at the panoramic thumbnail for NV and PTT, respectively.
